Terms and Conditions for submitting to a Springer Nature hybrid journal

By submitting a manuscript, the author(s) or rightsholder(s), as the case may be, agree(s) as follows:

1. **Grant of Rights**
   a) In consideration for evaluation of the manuscript for publication by the journal owner (the "Licensee"), the author(s) or rightsholder(s), as the case may be, (the "Rightsholder") grants the Licensee the rights to use of all versions of the manuscript for the purposes of analysis, testing, and development of publishing- and research-related workflows, systems, products, projects, and services; to confidentially share the manuscript with select third parties to do the same; and to retain and store the manuscript and any associated correspondence/files/forms to maintain the historical record, and to facilitate research integrity investigations. This grant of rights will remain in effect on a non-exclusive basis if the manuscript is withdrawn, not accepted for publication, or otherwise not published.
2. **Use of Article Versions**
   a) For primary research manuscripts, the Rightsholder may make the version of the manuscript first submitted for publication (the "Submitted Manuscript") available at any time and under any terms (including, but not limited to, under a CC BY license), at the Rightsholder's discretion. Once the article has been published, the Rightsholder will include an acknowledgement and provide a link to the version of record on the Licensee's website: "This preprint has not undergone peer review (when applicable) or any post-submission improvements or corrections. The version of record of this article is published in [insert journal title], and is available online at https://doi.org/[insert DOI]."
   b) For articles that are published on an open access basis (where offered by the journal for the relevant article type), Springer Nature encourages sharing of the published Version of Record under the terms of the relevant Creative Commons licence. Springer Nature's policies and guidance on self-archiving of open access articles are available on our website.
   c) For articles that are accepted and published on a subscription (non-open access) basis, the accepted version of the manuscript (the "Accepted Manuscript") may be made

available (i) by the author on their own personal, self-maintained website immediately on acceptance, and (ii) by the Rightsholder on any of the following twelve (12) months after first publication (the "Embargo Period"): with respect to individual authors, their employer's internal website; their institutional and/or funder repositories; and with respect to organisations, the Rightsholder's intranet (internal website available only to employees and contractors) over which the Rightsholder has sole operational control; and/or the author's academic institution's or funder´s repository (if any). Accepted Manuscripts may be deposited in such repositories immediately upon acceptance, provided they are not made publicly available until after the Embargo Period. Such uses of the Accepted Manuscript by the Rightsholder are subject to the conditions that (i) the Accepted Manuscript is not enhanced or substantially reformatted by the Rightsholder or any third party, and (ii) the Rightsholder includes on the Accepted Manuscript an acknowledgement in the following form, together with a link to the published version on the publisher's website: "This version of the article has been accepted for publication, after peer review (when applicable) but is not the Version of Record and does not reflect post-acceptance improvements, or any corrections. The Version of Record is available online at: http://dx.doi.org/[insert DOI]. Use of this Accepted Version is subject to the publisher's Accepted Manuscript terms of use https://www.springernature.com/gp/open-research/policies/accepted-manuscript-terms. Under no circumstances may an Accepted Manuscript be shared or distributed under a Creative Commons or other form of open access licence.

i. Accepted Manuscript versions of articles submitted by authors in certain categories, including US Government or Crown Rightsholders are not be subject to the conditions of this paragraph, whether published on a subscription or open access basis.

3. Controlling terms

a) These terms, and the terms of any publishing agreement entered into between the Rightsholder and the Licensee if the manuscript is accepted for publication, will supersede any other terms that the Rightsholder or any third party may assert apply to any version of the article.
